-

EXPERIENCE

SOFTWARE ENGINEER

A.D. Banker & Company, November 2016 - Present

Oversee the development and completion of our C# .NET REST Web API for third-party company and client integration. Led the development of the overhaul of our student enrollment application using C# .NET WebForms and JavaScript AJAX calls. Utilized REST APIs to build internal applications. Update and maintain customer-facing website and web applications.

SOLUTIONS ARCHITECT

Technology Group Solutions, LLC, January 2016 - November 2016

Managed and oversaw timely completion of all internal and client development projects. Designed, updated, and maintained several customer-facing websites, web applications, and self-service portal using C# .NET MVC, Ruby on Rails, Node.js, PHP, HTML5, CSS3/Sass, and JavaScript/jQuery. Utilized ConnectWise and LabTech Rest APIs and C# .NET SDKs for integration into our self service portal. Utilized test driven development to produce application, writing unit tests and providing extensive code coverage. Wrote scripts to automate previously manual processes.

CHIEF ADMINISTRATIVE OFFICER, DIRECTOR

The Cube Server Inc., January 2013 - May 2014

Co-founded a non-profit charitable organization to provide computers, games, peripherals, and a safe online environment to immunocompromised children going through chemotherapy to enable them to have fun and socialize with other kids. Participated on the board of directors, drafted and approved policies and objectives to improve the effectiveness of our charitable efforts. Trained and supervised a team of over 100 volunteers, and directed the weekly meetings between the members of upper management. Mediated issues between users to ensure and promote a safe and friendly environment on our online community. Designed, updated, and maintained customer-facing website using HTML5, CSS3, JavaScript, and PHP.

EDUCATION

FULL STACK WEB DEVELOPER

Centriq Training, September 2015 - January 2016
